

Torelief Plate Type - WF-95BII

Torelief WF95BII is a specially developed plate offering a medium hard flexible plate type for use in rotary letterpress printing of solids. The new technology employed in the formulation of this material, will allow the user to consider the advantages in increased ink transfer characteristics offered by softer shore plate material which can be obtained from this specially formulated plate, whilst obtaining a reliable printing medium ensuring trouble-free performance on the printing press.

1. Base Material: Polyester Film
2. Hardness: Shore D 40°
3. Features:
 1. Colour change on image area, obtained in the exposure cabinet enabling user to easily observe register marks and assist in the identification of pre-exposed plates from non-exposed material.
 2. Water washable plates by brush action producing faithful and clean plates.
 3. Coloured image area enabling easy inspection image detail on the printing surface of the plate.
 4. Extremely wide plate making latitude for optimum reproduction capability.
 5. Matte finished plate surface enabling good contact with film negative at shortest possible time.
 6. Extremely tough and high abrasion resistance photopolymer, for long printing life.
4. Main Application: [General label printing.](#)
