

Torelief Plate Type - WS-FHX4

Torelief WS-FHX4 is a specially developed range of high resolution plate materials offering users a hard shore extremely flexible plate type with an ultra-thin feather steel base for use in both dry offset and rotary direct printing.

The material's innovative formulation ensures sharp and accurate printing and reliable performance on press.

The ultra-thin feather steel base allows quick and easy mounting on magnetic cylinders without pre-curving as well as enabling plates to be archived in a completely flat state.

1. Base Material: Feather Steel
2. Hardness: Shore D 65°
3. Features:
 - a. Water washable plates by brush action producing faithful and clean plates.
 - b. Colour change on exposed image area enabling easy inspection of details on the plate's printing surface.
 - c. Special feather-steel base material enabling quick and accurate plate mounting on (magnetic) cylinders. No pre-curving necessary.
 - d. Extremely wide plate making latitude for optimum reproduction capability.
 - e. Matte finished plate surface enabling good contact with film negative in the shortest possible exposure time.
 - f. Extremely tough and high abrasion-resistant photopolymer ensuring a long print life.
4. Main Applications: [Metal Decorating and Label Printing](#).
